Python Programming

Assignment Date	25 October 2022
Student Name	GOPINATH R
Student Roll Number	713619106005
Maximum Marks	2 Marks

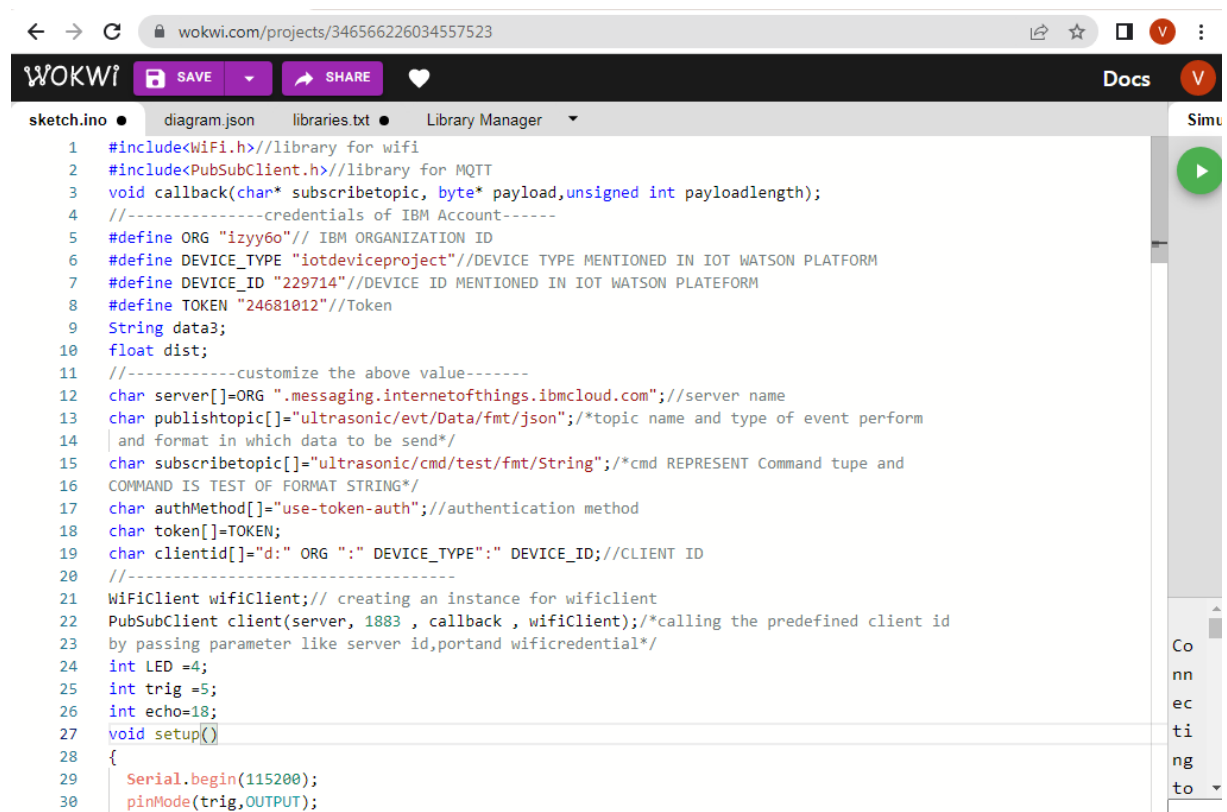

Question-1:

Write code and connections in wokwi for ultrasonic sensor.

Whenever distance is less than 100 cms send "alert" to ibm cloud and display in device recent events.

Upload document with wokwi share link and images of ibm cloud

Solution:

DATA SENT TO IBM CLOUD ON NO OBJECT DETECTED

The screenshot shows the IBM Cloud IoT Dashboard interface. At the top, there are tabs for 'Browse', 'Action', 'Device Types', and 'Interfaces'. A blue header bar contains the device name 'DISTANCEDETECT', its status 'Disconnected', the type 'ULTRASON', and the time 'Oct 20, 2022 9:46 AM'. Below this, there are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is selected, showing a table of events. The table has columns for 'Event', 'Value', 'Format', and 'Last Received'. There are five rows of data, all showing a distance of 79.66 and the object 'Near'. The 'Last Received' column indicates 'a few seconds ago' for each entry. At the bottom, there is a pagination bar showing 'Items per page: 50' and '1-2 of 2 items'.

Event	Value	Format	Last Received
Data	["distance":79.66,"object":"Near"]	json	a few seconds ago
Data	["distance":79.64,"object":"Near"]	json	a few seconds ago
Data	["distance":79.66,"object":"Near"]	json	a few seconds ago
Data	["distance":79.64,"object":"Near"]	json	a few seconds ago
Data	["distance":79.66,"object":"Near"]	json	a few seconds ago

WHEN NO OBJECT DETECTED BY ULTRASONIC DETECTOR

The screenshot shows the Wokwi IDE interface. On the left, the 'sketch.ino' file is open, displaying code for an ESP32 connected to an ultrasonic sensor. The code includes comments and defines variables for the device type, ID, token, and topics. The main loop calls the 'publish' function to send data to the cloud. On the right, the 'Simulation' tab is active, showing a visual representation of the ESP32 and the ultrasonic sensor. Below the simulation, the console output shows the following messages:

```
no object found
Sending payload: {"distance":141.21,"object":"No"}
Publish ok
Distancein cm141.21
no object found
Sending payload: {"distance":141.21,"object":"No"}
Publish ok
```
